Technical Documentation

Idea

I came up with the idea due to my addiction to movies and series , so i decided to create a community for people who like me

Introduction

**This website developed by Sara Adas with
Laravel 7.2**

→ **The Website**

Is made for viewing and pick up the right series or movie for watcher.

→ **It was made**

And build from existing theme where i developed it with extra features

→ **The Website**

Has 2 type of users other than the admin , guests and registered users

User Journey

User / Guest
didn't have to
register unless
they want to add
to favorite or to
watch later..

Guest can view
everything in
website also give
an anon
comment

Easy Search
based on many
categories and
clear for user

Front / Back end technologies

Front end :

- Html5
- CSS3 / Tailwind CSS
- JavaScript
- Bootstrap

Back end :

- PHP7 / Laravel 7.2
- MySQL

Database Diagram.

I Used TMDB for movies and series data

Admin

Admin_id	int	PK
Admin_fullName	text	
Admin_email	text	
Admin_password	text	
Created_at	datetime	
Updated_at	datetime	

User

User_id	int	PK
User_fullName	text	
User_email	text	
User_password	text	
User_confirm_password	text	
User_avatar	text	NULL
Remember_token	datetime	

Comment

Comment_id	int	PK
User_id	int	PK FK
Guest_id	int	
Comment	text	
Created_at	datetime	
Updated_at	datetime	
Deleted_at	datetime	

Obstacles

First i used a manually add movies and series and this was hard for me and wasting time then i realised an easy way to do this by using Api's which is easier for collecting data

Security

My website has been through security checks, making sure that the guards are working properly and each page matches the credentials it needs from users.

Installation

Given below are the steps you need to follow, to install the Project on your system:

→ **Step 1**

Composer Install

→ **Step 2**

Rename or copy .env.example file to .env

→ **Step 3**

Set your TMDB_TOKEN in your .env file. You can get an API key [here](#). Make sure to use the "API Read Access Token (v4 auth)" from the TMDB dashboard

→ **Step 4** php artisan key:generate

→ **Step 5** php artisan migrate / serve

The image features a vibrant red background with a series of concentric circles that create a hypnotic, tunnel-like effect. The circles are slightly darker in the center, giving a sense of depth. Overlaid on this pattern is the text "The End" in a white, elegant script font. The text is positioned diagonally across the center of the image, with "The" on the left and "End" on the right. The overall composition is simple yet striking, typical of a classic film ending screen.

The End
