# Idea

I came up with the idea due to my addiction to movies and series , so i decided to create a guide for people who like to watch like me

---

# StayCation

## -Movies and series

Made By Sara Majdi Adas  
Sara.adaass@gmail.com

---

# Introduction

**This website developed by Sara Adas with  
Laravel 7.2**

→ **The Website**

Is made for viewing and pick up the right series or movie for watcher.

→ **It was made**

And build from existing theme where i developed it with extra features

→ **The Website**

Public guide source where you don't have to sign in or register

# User Journey

User / Guest  
didn't have to  
register

Guest can view  
everything in  
website using  
scrolling or  
search

Easy Search  
based on many  
categories and  
clear for user

# Front / Back end technologies

## Front end :

- Html5
- CSS3 / Tailwind CSS
- JavaScript
- Bootstrap

## Back end :

- PHP7 / Laravel 7.2
- MySQL

# Obstacles

First i used a manually add movies and series and this was hard for me and wasting time then i realised an easy way to do this by using Api's which is easier for collecting data

THE   
MOVIE   
 DB

**Tailwind CSS**

**Laravel** Livewire

**AdminLTE**
