Project Brief

StayCation is an online database of information related to films, television programs including cast, production crew and personal biographies, plot summaries, trivia, ratings, and fan and critical reviews.

website or guidance will lead the user what to watch and where to watch movies and series and offering them clear description , review and trailer
Also users can comment as a registered one or guest mode.

The website is accessible to all internet users, but a registration process is necessary to contribute information to the site.

Most data in the database is provided by TMDB The site enables registered users to submit new comments and discussion.

All registered users can choose their own site name, and most operate anonymously. They have a *profile page* which shows how long a registered user has been a member, as well as personal movie ratings (should the user decide to display them) If a registered user or visitor is in the entertainment industry and has an account *page*, then that user/visitor can add photos to that page by enrolling in timeline.

Users are also invited to rate any film on a scale of 1 to 10, and the totals are converted into a weighted mean-rating that is displayed beside each title, with online filters employed to deter ballot-stuffing.
